PROFESSIONAL SUMMARY

Results-driven DevOps Engineer and Team Lead with over 2 years of hands-on experience designing, operating, and automating highly available cloud infrastructure. Specialized in building secure Continuous Integration / Continuous Deployment (CI/CD) pipelines, Infrastructure as Code (IaC), and container orchestration. Proven ability to guide cross-functional teams, accelerate delivery, and ensure system reliability for ambitious AI products.

CORE SKILLS

- **Cloud & Infrastructure:** Amazon Web Services (AWS - EC2, S3, RDS, VPC, IAM, Route 53, CloudWatch), Microsoft Azure, Infrastructure as Code (IaC), Terraform, Ansible
- **Containerization & Orchestration:** Docker, Kubernetes (K8s), Microservices Architecture
- **CI/CD & Version Control:** Continuous Integration / Continuous Deployment (CI/CD), Jenkins, GitHub, Git Version Control
- **OS & Scripting:** Linux System Administration, Python, Bash Scripting

PROFESSIONAL EXPERIENCE

Software Engineer & Team Lead | NeuralGarage Pvt Ltd

Jan 2026 – Present

- Architect and manage highly available Amazon Web Services (AWS) cloud environments (EC2, S3, RDS, VPC), improving system uptime to **99.9%** for mission-critical applications.
- Lead a team of engineers to deliver AI-driven projects, accelerating deployment cycles by **30%** through agile methodologies and cross-functional coordination.

Software Engineer | NeuralGarage Pvt Ltd

2024 – Jan 2026

- Built and maintained Continuous Integration and Continuous Deployment (CI/CD) pipelines using Jenkins and GitHub, reducing manual deployment errors by **40%** and accelerating release times.
- Containerized microservices applications using Docker and orchestrated them with Kubernetes, reducing infrastructure cloud costs by **20%** through optimized resource allocation.
- Automated Infrastructure as Code (IaC) provisioning utilizing Terraform and Ansible, decreasing server setup time from **4 hours to under 15 minutes**.
- Configured proactive system monitoring, log management, and alerting using AWS CloudWatch and CloudTrail, decreasing Mean Time To Resolution (MTTR) by **25%**.

PROJECTS

WAR-2 — AI-Powered Visual Dubbing & Lip-Sync System

- Designed Python-based processing pipelines for advanced video and audio handling, successfully processing over **10,000+** media frames with high synchronization accuracy.
- Integrated PyTorch models for realistic lip movement prediction, decreasing manual audio-video alignment time by **50%**.
- Utilized NumPy for frame-level feature vectors, alignment matrices, and coordinate transformations.

EDUCATION & CERTIFICATIONS

- **Microsoft Certified:** Azure Fundamentals (AZ-900)
- **Bachelor of Engineering (B.E.), Civil Engineering** – Bearys Institute of Technology
